PROJECT DESCRIPTION: Waste Management of Virginia, Inc. - Amelia Landfill Facility has applied for a Major Modification permit. The Amelia Landfill Facility will increase flaring capacity by adding a second 3000 SCFM open flare. The maximum annual emissions of air pollutants from the Amelia Landfill Facility flares is 58.9 tons per year NO₂; 129.3 tons per year CO; 16.1 tons per year PM/PM₁₀PM_{2.5}; 14.0 tons per year SO₂ and 3.9 tons per year VOC from the two 3000 SCFM open flares. The technology that will be used to control the air pollution from the facility includes the original equipment manufacturer's "good combustion practices." The estimated effect on air quality near the facility from the proposed project is to limit emissions below the Prevention of Significant Deterioration (PSD) major source threshold.

HOW A DECISION IS MADE: After public comments have been considered, DEQ will make the final decision unless the Air Pollution Control Board considers the permit. The board may consider the permit if the pollution source generates public concern or is precedent setting.

HOW TO COMMENT: DEQ accepts comments by e-mail, fax or postal mail. All comments must include the name, address and telephone number of the person commenting and be received by DEQ within the comment period. DEQ also accepts written and oral comments at public hearings.

TO REVIEW THE DRAFT PERMIT AND APPLICATION: The public may review the documents at the DEQ Piedmont Regional Office every work day by appointment. The draft permit is also available on the DEQ web site at www.deq.virginia.gov/info/publicnotices.html.
